1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Delete claim 16 without prejudice.

2. The following is an examiner's statement of reasons for allowance: Itoh et al (US Patent No. 5,229,762) teaches a display device having a selector to select a gradation conversion circuit; Ostromoukhov (US Patent No. 6,356,362) teaches a signal processing circuit having a halftoning mode selector for selecting a color processor between an error diffusion and a dither patterning processing circuit; however, the prior art of record fails to teach a display device comprising: a first input terminal which receives an analog image signal; a second input terminal which receives a digital image signal; an analog-to-digital converter connected to said first input terminal; a first switch which selects for output between a digital signal outputted from said analog-to-digital converter and a digital signal inputted to said second input terminal; and a gradation circuit which converts a digital signal outputted from said first switch into a signal indicative of a level of pseudo gradation, said gradation circuit comprising
